YAMUNA BANDLA

GCP Platform & DevOps Engineer

Mobile: +91 8341993352 | Email: yamunabandla2026@gmail.com | Hyderabad, India

EXECUTIVE SUMMARY

GCP Platform & DevOps Engineer with 4+ years of experience building, securing and operating cloud platforms on Google Cloud Platform. Designs and provisions repeatable GCP environments – VPC, subnets, firewall rules, Cloud NAT, IAM and Cloud Armor – with Terraform, and builds CI/CD pipelines in Jenkins and Bitbucket that take services from commit to Google Kubernetes Engine (GKE). Deployed 50+ backend services to production, cut deployment time by ~30%, hardened the network perimeter with Cloud Armor security policies and controlled outbound traffic through Cloud NAT. Owns platform monitoring and incident troubleshooting with Cloud Monitoring and Cloud Logging. Google Cloud Associate Cloud Engineer and HashiCorp Terraform Associate certified.

TECHNICAL SKILLS

Cloud Platform (GCP):	Compute Engine, GKE, Cloud Storage, Cloud Load Balancing, IAM
Networking & Security:	VPC, Subnets, Firewall Rules, Cloud NAT, Cloud Armor (WAF / security policies), IAM least privilege
Containers & Orchestration:	Docker, Kubernetes (GKE) – Deployments, Services, rollouts
Infrastructure as Code:	Terraform – reusable modules, multi-environment provisioning
CI/CD & Build:	Jenkins, Bitbucket Pipelines, GitHub Actions, Maven, SonarCloud
Monitoring & Logging:	Google Cloud Monitoring, Cloud Logging, alerting and dashboards
Scripting & Config:	Shell scripting, YAML, SQL
Version Control & Agile:	Git, GitHub, Bitbucket, JIRA (Agile/Scrum)
Certifications:	Google Cloud – Associate Cloud Engineer HashiCorp Certified – Terraform Associate (003)

WORK EXPERIENCE

PRODAPT SOLUTIONS PRIVATE LIMITED **Dec 2021 – Jul 2026**

DevOps Engineer

Client: Lumen Technologies **Sep 2024 – Jul 2026**

- Migrated backend services from legacy architecture to GCP, planning cut-overs to keep downtime minimal and improve performance.
- Designed and provisioned core GCP platform infrastructure – VPCs, subnets, firewall rules and Cloud NAT gateways – using reusable Terraform modules for consistent, repeatable environments.
- Configured Cloud NAT so private GKE nodes and VMs could reach external services without public IPs, keeping workloads off the public internet.
- Implemented Cloud Armor security policies on external load balancers to filter malicious traffic and protect internet-facing services.
- Built and maintained end-to-end CI/CD pipelines in Jenkins and Maven covering build, test and deployment, eliminating manual release steps.
- Containerized applications with Docker and deployed them to GKE, managing deployments and rollouts across environments.
- Improved deployment speed by ~20% by optimizing pipeline stages and removing redundant configuration.
- Set up monitoring and alerting with Cloud Monitoring and Cloud Logging; investigated and resolved production issues to reduce downtime.
- Managed IAM roles and service accounts for applications and team members using least-privilege principles.
- Worked in Agile/Scrum with JIRA – sprint planning, daily stand-ups and release tracking.

Client: Hyperoptics – UK Telecommunications **May 2022 – Aug 2024**

- Deployed and configured 50+ backend services on GCP, ensuring scalability and stable production releases.
- Automated deployments with Bitbucket Pipelines and Maven, reducing deployment time by ~30% and speeding up release turnaround.
- Provisioned GCP infrastructure – networks, firewall rules and compute – with Terraform for consistent deployments across environments.
- Defined firewall rules and network segmentation to restrict traffic between application tiers.
- Containerized application components with Docker for portable, consistent deployments.
- Built reusable deployment configuration templates and handled service onboarding and versioning, cutting duplicated setup work.
- Integrated SonarCloud quality gates into CI pipelines to keep deliverables clean and production-ready.
- Delivered sprint commitments in an Agile/Scrum team using JIRA.

EDUCATION

Bachelor's – Electronics and Communications Engineering **2017 – 2021**

Guntur, Andhra Pradesh
